

Mixed Flow Hooded Rooftop Supply or Exhaust Fans

Model XRID

When ventilating commercial kitchens, finding a product that combines reliable performance with configurable design options is essential, but not always easy. Fortunately, Accurex direct drive hooded rooftop fans are now available for both roof supply and exhaust, using our latest mixed flow wheel technology to enable a small footprint and quiet operation. They are powered by totally enclosed motors that are quickly accessible for serviceability, and available with the efficient Greenheck Vari-Green® motor that saves energy and costs. Take your airflow performance through the roof with Accurex model XRID fans.

Flexible Design, Dependable Results
