

Next Generation Upblast Exhaust Fans: XCUE

NEXT GENERATION DESIGN. SIMPLIFIED MAINTENANCE.

Known for industry-best performance and durability in clean air and grease-laden restaurant exhaust, Accurex's Upblast Exhaust Fans have been redesigned to include new features that make these fans even easier to install and service for operational cost savings in new and replacement applications.

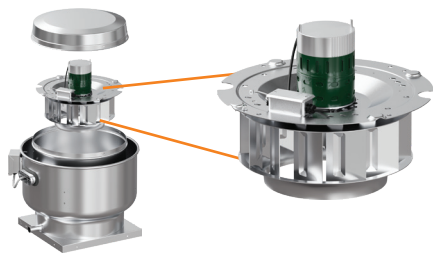

- 1 Toolless entry to motor compartment
- 2 Lower hoodband height
- 3 Power Pack motor/wheel assembly
- 4 Configurable curb cap

Available in model XCUE in sizes 060 to 240

NEXT-GENERATION FEATURES

Removeable Power Pack

Direct drive Power Pack consisting of wheel, motor, and support pan allows for quick and easy motor replacement and servicing.

Configurable Curb Cap

Configurable curb cap* available in 1-inch increments fits your exact needs making it easy to replace an existing fan with no adapter if curb sizes do not match, and eliminating costly grease duct modifications in replacement applications. Can also fit a larger curb for larger ductwork in new construction.

Select sizes available, additional sizes coming in 2026

Toolless Entry

Motor cover removal requires no tools and can be quickly accomplished by the push of two buttons. Allows for faster entry into the motor compartment with no screws to strip or lose.

Two-Conduit option available!

Code requires low-voltage control wiring to be separated from high-voltage power wiring. The Two-Conduit option* allows for code compliance with no need to field fabricate another wiring conduit chase. Applicable for non-grease exhaust fans only.

**Patent-pending feature*

Certifications:

- UL/cUL705—Clean Air and Grease
- High Wind and Hurricane**
- Seismic**

***Seismic and High Wind certifications are in progress for updated design.*

Lower Hoodband Height

Lower hoodband height enhances aesthetics and allows easier access to serviceable components for more efficient maintenance.
